

Summary of the 6.OEPM-PatCom Meeting at Madrid on March 08, 2013, 10:30 am Agreed Version

Participants: OEPM: Rubén Amengual
Blanca Vila Riudavets
Raúl Rodríguez Burillo

PatCom: Martine Massiera Della Valle
Olivier Huc
Georg Schultheiss

1. Welcome

Rubén Amengual welcomed the PatCom delegation and apologised because other business dates Maria Rosa Carreras and Carmen Toledo. Raúl Rodríguez Burillo from MaRo's group will give the OEPM ppt-presentation.

2. Approval of the Agenda

The proposed agenda has been accepted.

3. Minutes of the 5. Meeting in 2012

The agreed version of the summary of the fifth meeting in 2012 has been approved.

4. CPC Development and Experiences

5. Development of OEPM Web Services, Usage statistics

6. Provision of ES Data

7. Latipat and Co-operation with LA Countries and WIPO

Raúl Rodríguez Burillo gives a very comprehensive ppt-presentation for the agenda points 4 -7 which will be given to PatCom for the "members only section" of its web page. OEPM also during the last year worked hard to improve its web services.

In detail the following OEPM activities have been explained:

- Electronic Administration, where electronic applications are still increasing
- Interoperability and Open Standards
- Virtual Office in Operation
- Online Filing improved (2012: 55 %)
- ALFA System including data exchange in operation
- New Electronic Publication Services free of charge, 24x7, raw data provided online in end user format
- GSA Google activity

- Web Services for loading free data need user name and password (Sitadex, Invenes, Clinmar)

- Raw Data Service is only for inventions, in summer 2013 design may be available and by end of 2013 also trademarks Spanish IPC web release 2013 (cip.oepm.es). CPC is not yet included in ALFA, work is underway. Raw data of IPC in Spanish: <http://cip.oepm.es/descargas>
- Cited documents database (PATER) similar to Swedish Office is only for applicants and for a time period (Copyright)
- New Patent full document generation process for internal use
- Trademark co-operation exists with OHIM

Raúl Rodríguez Burillo asked for advice if PatCom members have more/other needs. OEPM shall be contacted directly. *Olivier Huc* stated that for PatCom raw data are the most important for hosting. For improvements see also page 20 of ppt-presentation.

The differences between LATIPAT at OEPM and EPO have been discussed as the coverage in INVENES is broader. OEPM is checking with EPO the reasons for this differences (see also: LATIPAT Synchronization, page 27 ppt).

INVENES Web Services:

http://www.oepm.es/en/invenciones/patentes_nacionales/tramites_linea/servicio_web_in_venes

At this moment it is possible to get bibliographic data (raw data XML) from INVENES WS. There is a project to get new Full text data from INVENES, depending on the quality of the resulting format, it could be published in OPENDATA together with the already present data.

Blanca Vila Riudavets is interested in the coverage of Spanish data in PatCom member data bases. *Georg Schultheiss* advised her to contact the members (representatives are given in the open member list in www.patcom.org) directly and explain to them, what she wants to know and why.

Rubén Amengual draw attention to the fact that OEPM by mistake published 60 documents too early. He will send a list of numbers for distribution to PatCom members. They are asked to take care of this and open the data only after real publication date.

8.AOB: Date of Next Meeting

The seventh regular OEPM-PatCom Meeting will be in spring 2014 at Madrid. Details will be agreed between *Carmen Toledo* and *Georg Schultheiss*.

Rubén Amengual adjourned the meeting at 12:15.

Georg F. Schultheiss
Secretary of PatCom

12.03.2013
