The agreed summary has been approved.

In the discussion all participants stated, that in future this will not more be a playground for EPO only. Although national offices hesitate to participate, meanwhile China has signed and Brazil is on the way.

4. Development of PRV Services

5. Development in Electronic Publication and Legal Status Update

Asa Viken gave a demonstration how PRV will use the Federal European Patent Register as a web-service for legal status search to be launched in 2014 although there are still difficulties for different countries.

In MT the SE-EN former work resulted in improvements for the EPO/Google-project. The PRV-project is closed. For the future development it is unclear if there will be a new business model and a pricing system.

Anders Bruuns mentioned that the German classification DPK is available at PRV in English, German and Swedish.

6. Licensing of PRV Material – Full Text Delivery

Johan Winther explained that for full-text delivery is not yet in priority.

Willem Lagemaat asked for the Bacon-archive on disc or on tape. He hopes to see no copyright problems. As EPO has not enough capacity e.g. for delivering all pictures of one

country, he asked if PRV has a copy. *Johan Winther* will check it, if there are better ways to get the material.

In a short discussion on pricing policies and the PRV possibilities, PRV declared that development costs cannot be charged but the situation will be checked also.
